The listed measures represent extrapolated average values that may be slightly different on the product (± 2% ± 5 cm).

Traditionally, the nominal dimension is calculated by doubling the rib length. For this reason, the nominal dimension can exceed the specified tolerance range.

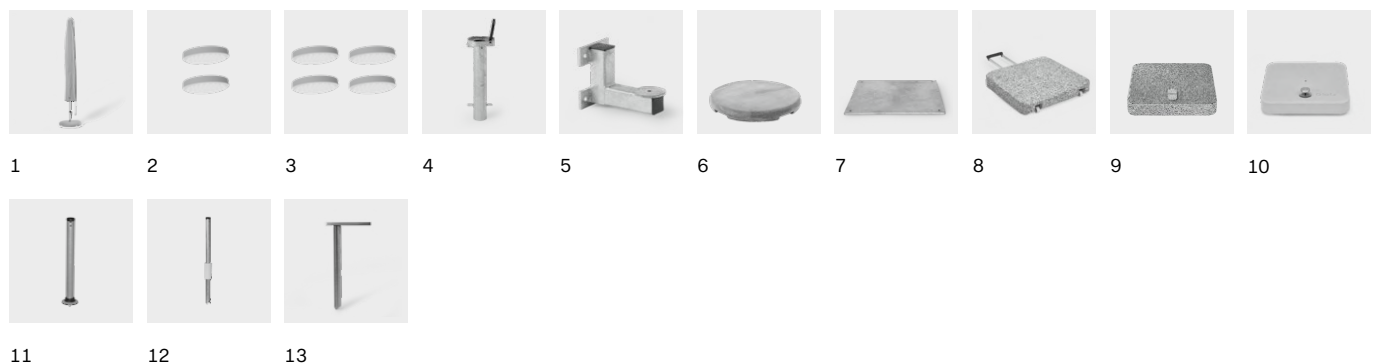

Height dimensions are based on ground socket BT. These vary slightly depending on the type of base. Except for steel base minus 5 cm.

The max. wind speed limits as per our separate sheet apply only if the parasol canopy is in a horizontal position and if there is a fix ground anchorage.

In the presence of several parasols, the minimum distance between one parasol and another and between parasols and walls shall be 20 cm.

Loose cover max. 10 cm, concrete thickness
min. 30 cm (pay attention to frost depth),
Guarantee water drainage

Accessories		Absolutely necessary	Order no.
Protective cover made of coated, tear-resistant polyester fabric			
1	Protective cover with zip and rod		350 01 609 980
	10 pieces, protective cover with zip and rod		350 01 609 974
