Pavillion

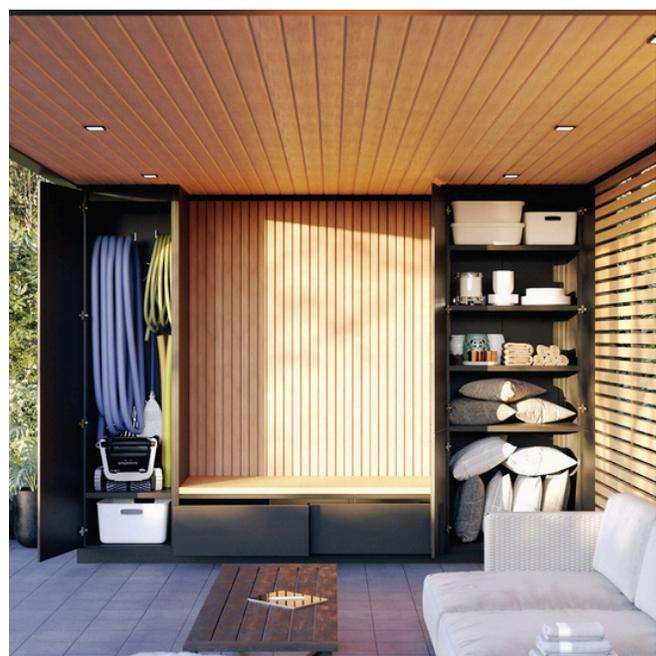

ORIGIN

A fully aluminum, open-air structure designed for flexibility, elegance, and performance in any outdoor setting.

Expandable system with a wide range of accessories for tailored functionality

The modular structure accommodates an array of accessories: storage units, privacy panels, integrated walls, or planters, to create spaces that are as functional as they are refined. Each addition enhances comfort and usability, allowing the Pavilion to evolve with its surroundings.

ORIGIN pavilion

**Sleek, open design
that enhances both
commercial and
residential spaces**

The Origin's minimalist architecture and balanced proportions make it equally suited for public courtyards or private gardens. It provides a defined sense of space while maintaining a light, open character that integrates naturally with its surroundings.

Modular aluminum framework built for strength and adaptability

Constructed from high-grade aluminum profiles, the Origin Pavilion combines robust engineering with a modular system that adapts to any layout. Its versatile structure can define lounge areas, dining zones, or pathways, offering both strength and flexibility for creative outdoor design.

Engineered for year-round durability and full winter resilience

Designed for demanding climates, the Origin Pavilion is built to withstand the weight and stress of a full Canadian winter, not just a light snowfall. Its precision-engineered aluminum structure and weather-resistant powder-coated finish provide lasting protection against corrosion, UV exposure, and seasonal wear, ensuring performance year after year with minimal maintenance.

Multiple configurations and finish options for a cohesive architectural fit

Offered in various sizes, colors, and layouts, the Origin Pavilion can be customized to complement any architectural setting. From understated neutral tones to bold contemporary finishes, it harmonizes seamlessly with both natural and built environments.

ORIGIN pavilion

TECHNICAL DETAILS

Materials

- 6063-T6 aluminum provides good structural stability and superior corrosion resistance.
- All stainless steel 18-8 hardware.

Thermoset polymer finish

Architectural grade thermoset powder coating. Excellent durability and protection against exterior corrosion and environmental factors.

Adapted to withstand severe levels of UV radiation, irregular humidity levels, temperature variations and other extreme weather conditions.

Meets and exceeds most building standards, including AAMA 2604 specifications and LEED credits.

Solid colors available for the entire structure including frame and structure and slats.

Wide range of colors available upon request (\$).

• Available accessories

- Fixed or motorized screens
- Privacy screens made of composite slats or cut-out aluminum panels
- Storage module or locker room
- Glass partitions

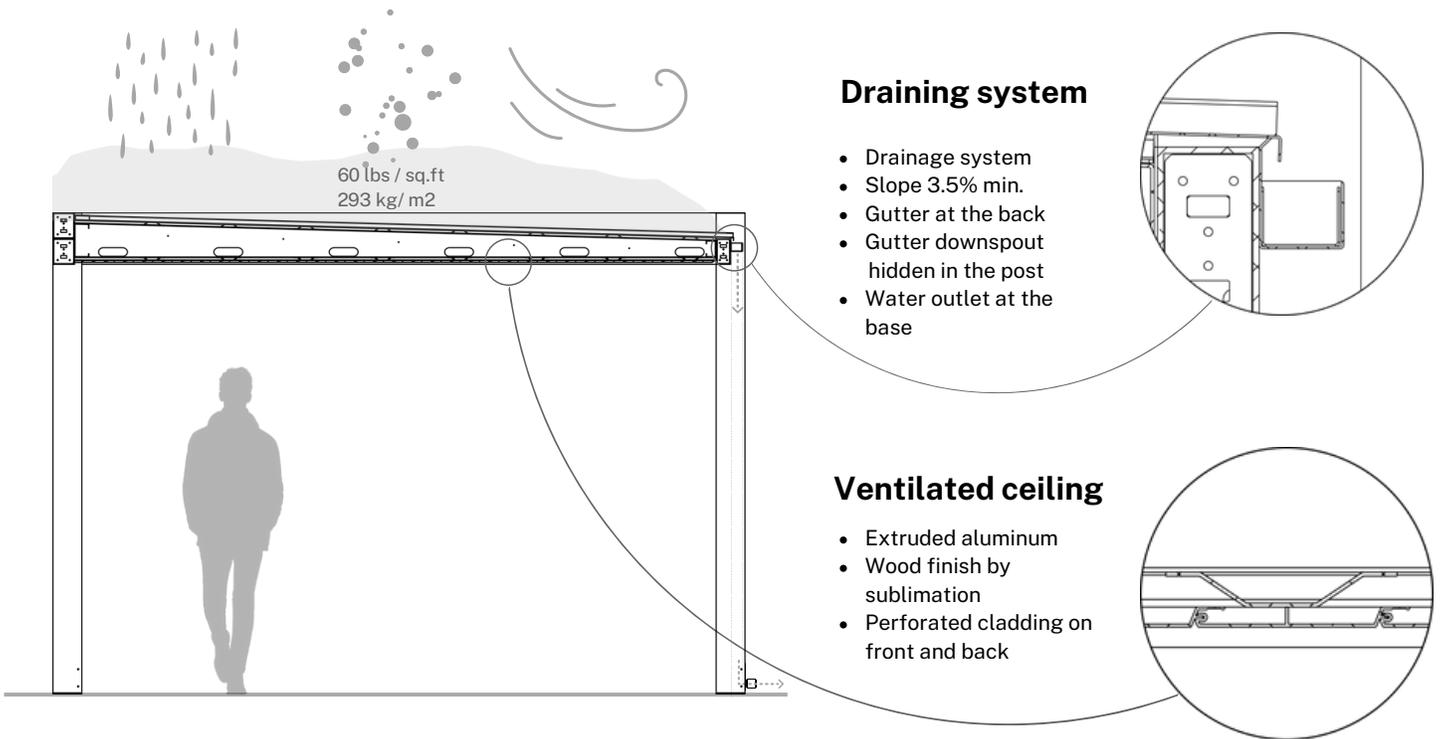

Sublimated wood finish

Excellent resistance to UV rays and atmospheric agents.

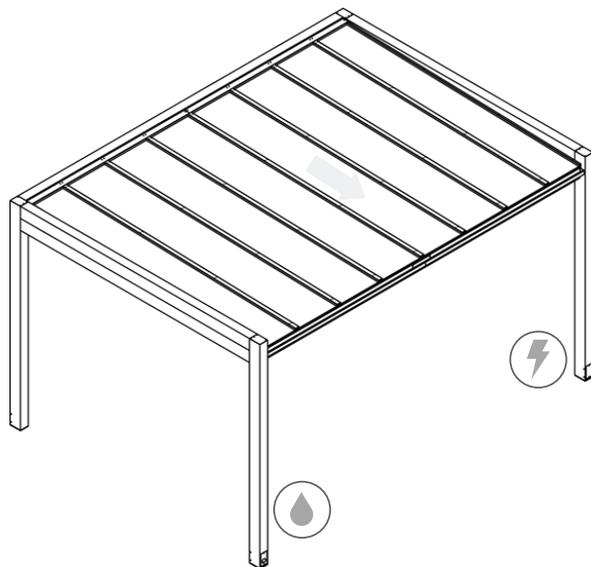

It allows to combine the beauty of the natural element with the resistance and total absence of maintenance.

Wood finish available for slats only.

Other wood finishes available upon request (\$) minimum quantities may apply.

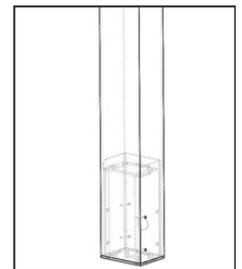

Dimensions & design guide

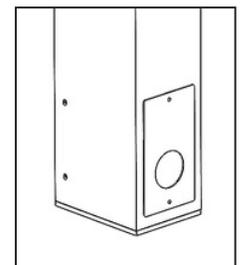

Recessed column base 16 inches.

- Installation directly on the floor, on the covering.
- Must be anchored to a structural element under the cladding:
 - Wooden patio structure
 - Concrete slab
 - Sonotubes or concrete footings under the paving stones

Electrical input and water output.

- When planning the project, plan for an electrical input and a water output.
 - The openings on the back posts can be used for either feature.
- Easy wiring in the structure for electrical accessories or additional lighting.

3.7" (95mm) round recessed light

- 24V, 6W
- 400 Lumens
- Black, white and satin nickel installation rings included
- Variable intensity
- 3000K and 4000K
- Intelligent control
- Compatible with most voice control and home automation systems

4" (102 mm) square recessed light

- 120V, 40W
- 550 Lumens
- Available in black, white and satin nickel
- Variable intensity
- 3000K
- Intelligent control available
- Compatible with most voice control and home automation systems

*Requires the installation of a switch either near the electrical source or in a waterproof box near the structure.
