OUTDOOR KITCHEN GUIDE

stationgrill.ca

ABOUT US

In 2013, following the realization of their first outdoor kitchen and interest in the latter, the owners decided to found Station Grill. Station Grill was shown to the general public at the 2015 National Home Show in Montreal, Canada.

Station Grill Outdoor Kitchen are designed to offer design flexibility and maintenance-free construction without compromising on functionality. Our success for precision, coupled with our passion for design, guarantees a successful project every time. It is important for us to listen to our customers in order to understand their needs and desires in order to better support them in the realization of their project.

An outdoor kitchen is just as important as an indoor kitchen: it is at the heart of your yard just as your indoor kitchen is the heart of your home. For this reason, Station Grill wants to set the standard for outdoor cooking and to be the leader in the modern outdoor kitchen.

SOME BASIC INFORMATION IS NEEDED WHEN DESIGNING AN OUTDOOR KITCHEN

The location and the space allocated to the project.

What is the type of flooring? It's important because it is the first reason for a countertop break.

RECOMMENDED

- Deck of wood or composite on foundation or screw piles
- Pedestals for roof terraces
- Concrete slab

NOT RECOMMENDED

- Terrace in paving stone, due to the movement of the ground.

The type of configuration of the kitchen, and the type of appliances to integrate with the outdoor kitchen (grill, burner, refrigerator, ice machine, etc.).

- Brand appliances, this will influence the layout as well as the counter depths.
- Accessories to integrate with your layout (sink, trash, recycling, ice tray, herbs tray, sink, faucet, etc.).
- Provide connections to gas, electricity, water and return water.

The type of cladding and the color of the house.
Combustible or not?

It is important to talk about the budget to properly guide your client in their purchase of an outdoor kitchen.

APPLIANCES

CABINET

Station Grill cabinets are entirely made of 3/4 "black PVC. They are:

- Durable
- Easy to maintain
- Weather resistant
- Resistant to temperature changes
- Mold resistant

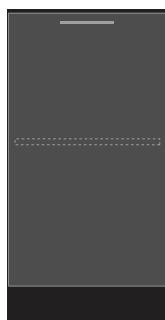

Cabinets are available in standard sizes.

Just like interior kitchens, we offer different configurations: doors, drawers, door and drawer combination, all with BLUM hardware.

OUR COLLECTIONS

We have created five collections of door facades, each offered in a wide range of colors and finishes. This vast choice ensures a happy marriage of our kitchens to outdoor environments or the extension of the interior design. Custom integration of high-end grills combined with easy-to-clean accessory storage areas complements it all. It has never been easier to create quality outdoor environments.

PUR

PUR COLLECTION

Our Pur collection is made of marine-grade high-density polyethylene (HDPE), an exceptionally weatherproof material. The polymer panels used have slim V-shaped edges and a lightly textured finish.

AVAILABLE IN 9 COLORS

EXTERIOR FINISHING PANELS

Designed for both function and aesthetics, these 4½ inch-wide panels with toe kick allow seamless integration of electric, gas, and water lines within your outdoor kitchen. Crafted from NEXBOND™, they offer a maximum width of 84 inches, ensuring minimal seams for a sleek and polished look.

Station Grill proudly presents NEXBOND™, our latest innovation in aluminum composite panels, engineered to seamlessly match all solid colors in our collections for a cohesive and refined outdoor kitchen design.

More than just aesthetics, NEXBOND™ features matte architectural-grade PVDF paint and an advanced Nano technology finish, enhancing durability while making maintenance effortless. Its innovative surface resists dirt and stains, keeping your outdoor kitchen looking pristine with minimal effort.

The work surface is one of the key elements of the indoor and outdoor kitchen. Of course, it is a work plan for the meal preparation, but also it's the favorite place to serve appetizers or drinks.

Regardless of the layout of your outdoor kitchen the countertops are custom made to meet your needs. Contact your stone fabricator for more details.

For all of these reasons, Station Grill suggests the use of ultra-compact surfaces and high performance porcelains.
